

Keep the Ocean and Beaches Clean

NO tires basura al mar o playas

Do not throw litter into the ocean or onto beaches. Waste poses a serious threat to wildlife and habitats. Plastics, which are not biodegradable, become marine debris that entangles and kills thousands of animals each year.

La basura supone un peligro significativo para la fauna y los hábitats. Los plásticos, que no son biodegradables, acaban convirtiéndose en residuos oceánicos, enredando y matando a miles de animales cada año
